DANIEL NASH

Senior AI Product Manager | Applied AI Products & Agentic Workflows

Camarillo, CA | 850-384-0309 | danash1611@gmail.com
danielnash.co | linkedin.com/in/daniel-a-nash | github.com/DanielNash1611

SUMMARY

Senior product manager and hands-on creator who turns unclear business and user problems into practical products. More than a decade across product, platforms, and business transformation, with enterprise AI implementation since January 2024. Works across business, design, and engineering to frame the problem, build and test the solution, and carry it into delivery; specializes in applied AI and agentic workflows.

> **Took AI into real workflows** - OMS assistant reached production with custom APIs, human review, and PII-safe validation.
> **Improved expert-facing quality** - Patent-search hallucinations fell from 100% to 0% in the measured evaluation set.
> **Scaled beyond a prototype** - ChatGPT Enterprise reached about 1,000 licensed and 800 active users.

SKILLS

Product Judgment: Discovery & Problem Framing | Product Strategy | Roadmap Prioritization | Cross-Functional Delivery

Applied AI: Agent & Tool Workflows | API Integration | Retrieval Grounding | Evals | Human-in-the-Loop Review

Validation & Adoption: Rapid Prototyping | User Research | Experimentation | Governance | Adoption Measurement

PROFESSIONAL EXPERIENCE

AI Catalyst & Product Manager

Zimmer Biomet - Camarillo, CA (Remote) | Jul 2026 - Present
Contract engagement via Spectraforce.

- Lead discovery and product decisions in the first AI pod, turning business and user needs into prioritized requirements, working prototypes, and sprint decisions.
- Build Claude Code prototypes and contribute them through enterprise pull requests; developers incorporate that work into implementation, making product direction executable.

AI Product Lead, Research Workflows (Part-Time)

Immiatrics - Remote | Jan 2026 - Present

- Lead product and technical strategy for Immunology Scout, a production AI assistant for immunology literature and patent discovery; translate scientist needs into retrieval, evaluation, and source-approval requirements.
- Used scientist feedback to create evaluation cases and guide agentic iteration, reducing patent-search hallucinations from 100% to 0% in the measured evaluation set while retaining human source review.

Senior AI Product Manager, Enterprise Systems

Guitar Center - Westlake Village, CA | Feb 2025 - May 2026

- Took the OMS AI assistant from Canvas prototype to production, connecting OpenAI and custom OMS APIs for order lookup and human-reviewed cancellation with PII-safe validation.
- Pitched an AI Platform around reusable connectors, retrieval, permissions, and review patterns; built proofs of concept and helped move the capability into production.
- Scaled ChatGPT Enterprise to about 1,000 licensed and 800 active users through direct OpenAI partnership, Champions, and reusable governance and enablement pathways.

Senior Product Manager - Contact Center & Order Management Systems

Guitar Center - Westlake Village, CA | Jan 2024 - Feb 2025

- Authored the first 3-year Contact Center and OMS roadmap, secured C-suite alignment, and tied prioritization and sequencing to company OKRs, ROI, annualized time savings, and weighted reach.
- Uncovered the complexity in agent workflows and reduced tool sprawl from 16 systems to 9 in one year; technology satisfaction increased from 40% to 65%.
- Led the Contact Center ChatGPT pilot; survey-estimated savings of 2.5 hours per agent weekly contributed to a business case projecting about $2.7M in annualized impact and informed enterprise expansion.
- Partnered with OMS to replace an external returns process with an in-system flow, saving about 2,000 annual customer hold-time hours.

Product Manager - eCommerce Journeys

Guitar Center - Westlake Village, CA | Jun 2022 - Jan 2024

- Led a 12-week checkout redesign with UX, UXR, engineering, and QA; post-launch A/B testing showed about 3% conversion lift and an estimated $16M annualized revenue impact.
- Created the ecommerce testing and personalization Center of Excellence after implementing Monetate, establishing repeatable experimentation and personalized-experience practices.

Platform Operations Specialist, eCommerce Platforms

Guitar Center - Westlake Village, CA | Feb 2020 - Jun 2022

- Connected merchandising and business needs with engineering through workflow diagrams, documentation, business proposals, and ecommerce platform operations.

Product & Operations

DigitalFusion - Culver City, CA | Nov 2017 - Jan 2020

- Built an ecommerce-to-production workflow that converted artist orders into fulfillment work, helping retain high-value clients while preserving their storefronts.
- Grew Client Solutions monthly revenue by 11% over 18 months through customer-focused team practices, service development, and data-informed operating decisions.

Product Consulting & Go-to-Market Strategy

Virtual Scriptures - Provo, UT | Sep 2016 - Aug 2017

- Shipped 2 interactive applications in 6 months by aligning technical and creative teammates around lean delivery practices.

SELECTED AI PRODUCTS

Music Notation Assistant - Directed AI-assisted development of a local notation prototype with distinct chord, note and transposition workflows, narrow tool contracts, and bounded correction; scoped evaluations and deterministic validation support a separate opt-in transactional Preview/Apply/Undo workflow that preserves composer control.

Portfolio & AI Career System - Directed AI-assisted development of a deployed portfolio assistant with authenticated, public-safe retrieval and resume workflows; added captured-output replay and source-cited Codex review packets to separate deterministic checks from semantic review.

TOOLS

Codex | Claude Code | OpenAI API | ChatGPT Enterprise | Jira Product Discovery | Figma | Adobe Analytics | Monetate | GitHub
