DANIEL NASH

AI Product & Transformation Leader | Solving What Stands Between Ideas and Delivery

Camarillo, CA | 850-384-0309 | danash1611@gmail.com
danielnash.co | linkedin.com/in/daniel-a-nash | github.com/DanielNash1611

SUMMARY

Product and transformation leader who solves difficult business problems in complex organizations. More than a decade across product, platforms, and business transformation, including enterprise AI leadership since January 2024. Connects executive priorities with user needs and delivery realities, combining independent problem solving, cross-functional leadership, and hands-on creation to turn ideas into working products and stronger product practices.

> **Simplified complex workflows** - Reduced 16 systems to 9; technology satisfaction rose from 40% to 65%.
>
> **Delivered commercial value** - Checkout redesign showed about 3% conversion lift and an estimated $16M annualized revenue impact.
>
> **Scaled governed AI** - ChatGPT Enterprise reached about 1,000 licensed and 800 active users.

SKILLS

Product & Transformation: Problem Framing | Portfolio Prioritization | Roadmap & OKR Alignment | Product Operating Models

Leadership & Delivery: Executive Alignment | PM / PO Coaching | Stakeholder Onboarding | Adoption Strategy

Applied AI: AI Product Strategy | Agentic Workflows | Prototypes & Evals | Responsible AI Governance | Legal & Security Partnership

PROFESSIONAL EXPERIENCE

AI Catalyst & Product Manager

Zimmer Biomet - Camarillo, CA (Remote) | Jul 2026 - Present
Contract engagement via Spectraforce.

- Lead discovery and product decisions in the first AI pod, turning business and user needs into prioritized requirements, working prototypes, and sprint decisions.
- Established discovery, delivery, and reporting practices that subsequent pod PMs are adopting, extending the first pod's working model across the program.
- Build Claude Code prototypes and contribute them through enterprise pull requests; developers incorporate that work into implementation, making product direction executable.

AI Product Lead, Research Workflows (Part-Time)

Immiatrics - Remote | Jan 2026 - Present

- Lead product and technical strategy for Immunology Scout, a production AI assistant for immunology literature and patent discovery; translate scientist needs into retrieval, evaluation, and source-approval requirements.
- Used scientist feedback to create evaluation cases and guide agentic iteration, reducing patent-search hallucinations from 100% to 0% in the measured evaluation set while retaining human source review.

Senior AI Product Manager, Enterprise Systems

Guitar Center - Westlake Village, CA | Feb 2025 - May 2026

- Pitched an AI Platform around reusable connectors, retrieval, permissions, and review patterns; built proofs of concept and helped move the capability into production.
- Scaled ChatGPT Enterprise to about 1,000 licensed and 800 active users through direct OpenAI partnership, Champions, and reusable governance and enablement pathways.
- Established the initial AI Center of Excellence with Legal, Security, and Engineering, making responsible delivery, adoption pathways, and security-aligned settings repeatable.
- Built an eight-week onboarding program for PMs and stakeholders and coached 4 PMs and Product Owners concurrently, strengthening shared discovery and prioritization practices.

Senior Product Manager - Contact Center & Order Management Systems

Guitar Center - Westlake Village, CA | Jan 2024 - Feb 2025

- Authored the first 3-year Contact Center and OMS roadmap, secured C-suite alignment, and tied prioritization and sequencing to company OKRs, ROI, annualized time savings, and weighted reach.
- Built decision-ready intake and RICE prioritization with strategy-weighted Reach, giving product teams and executives a consistent basis for comparing opportunities and making tradeoffs.
- Uncovered the complexity in agent workflows and reduced tool sprawl from 16 systems to 9 in one year; technology satisfaction increased from 40% to 65%.
- Led the Contact Center ChatGPT pilot; survey-estimated savings of 2.5 hours per agent weekly contributed to a business case projecting about $2.7M in annualized impact and informed enterprise expansion.

Product Manager - eCommerce Journeys

Guitar Center - Westlake Village, CA | Jun 2022 - Jan 2024

- Led a 12-week checkout redesign with UX, UXR, engineering, and QA; post-launch A/B testing showed about 3% conversion lift and an estimated $16M annualized revenue impact.
- Created the ecommerce testing and personalization Center of Excellence after implementing Monetate, establishing repeatable experimentation and personalized-experience practices.

Platform Operations Specialist, eCommerce Platforms

Guitar Center - Westlake Village, CA | Feb 2020 - Jun 2022

- Connected merchandising and business needs with engineering through workflow diagrams, documentation, business proposals, and ecommerce platform operations.

Product & Operations

DigitalFusion - Culver City, CA | Nov 2017 - Jan 2020

- Grew Client Solutions monthly revenue by 11% over 18 months through customer-focused team practices, service development, and data-informed operating decisions.
- Built an ecommerce-to-production workflow that converted artist orders into fulfillment work, helping retain high-value clients while preserving their storefronts.

Product Consulting & Go-to-Market Strategy

Virtual Scriptures - Provo, UT | Sep 2016 - Aug 2017

- Shipped 2 interactive applications in 6 months by aligning technical and creative teammates around lean delivery practices.
